  - Gather client requirements and prepare detailed proposal plans.
  - Develop backend development plans and architecture.
  - Work on integrations with AI and various third-party services.
  - Communicate with clients, translate requirements into tasks, and ensure alignment with business needs.
  - Oversee the team, assign tasks, and provide accurate time estimations.

PROJECTS

1. *Nartik* (USA Client)

🔗 Staging Site

- Built an **AI-driven financial analysis system** from scratch.
- Integrated **Plaid** for users to connect their bank accounts securely.
- Developed an **algorithm** to analyze user spending patterns and recommend the best credit cards based on potential savings.
- Worked with multiple **third-party services** for data analysis and AI-driven recommendations.

2. ***I Makeup*** (*Saudi Arabia*)

🔗 [Live Site](#)

- A full **ERP system** for managing cosmetics and beauty products.
- Implemented advanced inventory management, purchase orders, and financial tracking.
- Integrated multiple payment gateways (**Tabby, Tamara, PayTabs, HyperPay**) and **shipping services** (**Torod, Aramex**).

3. **Amoy Supply** *(Saudi Arabia)*

🔗 [Live Site](#)

- A B2B platform for customized cup sleeves, bags, and packaging solutions.
- Built a system where clients request samples or bulk orders, which are processed via the supply chain in China.
- Integrated **shipping methods** (land, sea, and air) to provide flexible logistics options.

4. **Happy Ordering** *(USA Client)*

🔗 [Demo](#)

- Developed the backend for the platform.
- Integrated **Stripe - Express** for tenant and super master payment processing.
- Optimized the payment flow and ensured smooth financial transactions.

5. **Social Followers** *(Current Project)*

- A platform for **buying and selling likes, followers, and engagement** across various social media platforms.
- Integrated with **third-party services** that provide real-time social media engagement.
- Developed a secure and automated system for order processing and fulfillment.
- Managed API integrations to ensure seamless transactions and delivery of services.

Technical Skills

Programming Languages & Frameworks

- **PHP** (Laravel, Native PHP).
- **Python** (Django).
- **Vue.js.**

Backend Development

- **RESTful API Development.**
- **Third-Party API Integrations** (Payment gateways, AI services, social media platforms)
- **Microservices Architecture.**
- **ERP System Development.**

Web Scraping & Data Processing

- **Python Scrapy, BeautifulSoup.**

Database & Search Technologies

- **MySQL, Elasticsearch.**
